FLASH!!!

You want to know where this neat new shop is....Finding our shop is really not that difficult. We have been hearing horror stories about our customers driving up and down Main Street for hours trying to find us....One called a friend from a phone booth - her friend called us then relayed the info back to waiting friend....That was team work!!!! WE LOVE that kind of patience and perseverance. We'd be nuts if we didn't try and help make your way to our darling little store easier....first, the address is 2506 Main Street. We are directly across from TRICO. The street, Rodney, runs into Main at the shop. There is a street light at that intersection. A Sunoco station is my next door neighbor. The CPG (Central Park Grill) is kitty corner north across the street. We are about two blocks closer downtown on the same side of the street as The Stuffed Mushroom. South of Amherst and Filmore - and the radar police usually park in front of my store on Saturday mornings (sometimes during the week too). There is a tree blocking all view of the store, the mums I planted to help make us easier to see have died with the first frost - but...I have ordered an awning (I'm sure I will regret this decision when the snow

blows in and I don't have any wind breakers....) If all else fails - call 835-8639...

By the way...WE SORTA changed our hours....how does 12:00 pm til 7:30 pm sound? - WEDNESDAY through SUNDAY. Holiday times will be posted. Special orders are taken at least one week in advance - Ideas welcome and most times taken. Menus are forthcoming (even though I don't want to get boring... there are some of you out there that just need to be creatures of habit - BOO!) Micro/oven plastic containers are in - we still don't have hot food - soon....But, we do have real food, which brings me to the topic of caring for Marilyn's food... No preservatives, stabilizers, gelatins if you please!!!!The whipped cream in this joint is Charlaps ... the highest butter fat content in heavy cream in this city - and my custards.... they are not like those non-dairy products that last for sixteen generations... you have to eat fast - PROMISE - this is like the old days when granny used to cook. My sauces will break (a term used when you heat a cream soup or sauce too high and it kind of curdles) because there aren't ten million weird things in them to keep them together. This is a different place - a wonderful treat.

Cooking classes are soon to be announced. We will make up and deliver gift baskets - meals for small groups - You should call ahead for deliveries - we get really busy this time of the year.

Write in comments on the shop or whatever - we'll print your remarks if you wish...tell your friends to sign the mailing list...I'm running out of room.....

*Marilynn*
